

WE makes Outline the main attraction at Playboy Club

New Delhi based White Eagle (WE) Entertainment has been providing audio and lighting solutions in a number of high profile venues in India.

The company's latest feather or should we say "bunny ears" in their cap is the swanky new Playboy Club in Hyderabad where celebrities and members of the country's high society make no secret about their love for living the fashionable life.

Mr. Arun Kalra, Director of White Eagle Entertainment was consulted in the design of the sound and chose to use a high power Outline audio solution for the Main Bar, the Members Lounge, and the VIP Bar.

The models of Outline systems installed include: 4 x Doppia II 9075 and 4 x DBS 18-2i Subs as the main floor system, and 8 x Eidos 12 full-range speakers for the Main Bar. For the Members Lounge, the system uses four more Eidos 12 speakers.

The system in the VIP Bar uses 2 x Eidos 12 along with a single Eidos118s Subwoofer. Driving the speakers are 4 units of Outline M5000-4 Amplifiers and one units of Outline T20-1 amplifier. System management was from two units of APEX Intelli-X² (4 inputs/ 8 outputs). White Eagle also provided SLA 15" speakers as the DJ monitors.
